Believing Inferences

DIRECTIONS: Complete the chart by describing characters in the novel. These characters may directly exhibit their traits, attitudes, feelings, and motives, or you may have to *infer* them (indirectly). Peruse the text to find examples that indirectly describe the characters. Write the reference, or paraphrase if it is too long, along with the page number. If you can only find direct Text Support for a box, write TS next to what you located.
